

SUNDEEP GIRN

UI/UX Designer | AI-Driven Product Design

London, UK | +44 (0)7592 448 719 | sundeepgirn@yahoo.co.uk

Portfolio: <https://sundeepgirn.wixsite.com/my-site>

PROFILE

Hi, I'm Sunny!

A product designer transitioning from a 9-year architecture career with a strong foundation in visual storytelling, spatial design and client collaboration. Passionate about crafting intuitive, scalable digital experiences with an emerging focus on integrating AI into user-centred design solutions.

AI & TECH EXPOSURE

Technologies & Concepts

- Prompt Engineering (ChatGPT, Midjourney, Claude)
- NLP, Computer Vision, AI Agents, Content Generation
- Segmentation, Prediction, Multi-Modal AI Interfaces
- AI Ethics, EU AI Act Awareness, Fairness, Trust in AI Design
- AI Risk Identification and Guardrail Design

Applications in Design:

- Designing AI-augmented user flows and product touchpoints
- Developing multi-modal prototypes that align with user needs
- Conducting lean experimentation and hypothesis testing in AI UX
- Safeguarding outputs through ethical design and user trust practices
- Crafting AI-ready UX strategies aligned with commercial KPIs

SKILLS

Design & UX:

User Research

- Wireframing
- Prototyping
- Usability Testing
- Human-AI Interaction
- Ethical UX
- Design Systems

Tools:

- Figma
- Adobe Photoshop
- Revit
- AutoCAD
- Enscape

LANGUAGES

- English (Fluent)
- Punjabi (Fluent)
- Hindi (Conversational)
- German (Basic)

INTERESTS

- Field Hockey
- Gym
- Cooking
- Art & Museums
- Hand Drawing
- Tech

EDUCATION

Sep 2012
Jul 2015 | **Southampton Solent University** - BA (Hons) Architectural Technology

PROFESSIONAL DEVELOPMENT COURSES

Apr 2025 | **Intro to AI Product Design**, ELVTR

Oct 2022 | **Product Design**, Dribbble

Aug 2022 | **Intro to UI Design**, Dribbble

EXPERIENCE

Jan 2022
Present | **Fluent Architectural Design Services** - Architectural Designer

- Led client design workshops and created immersive VR walkthroughs and 3D panoramas.
- Audited user and business needs, proposing solutions to improve experience and efficiency.
- Applied design thinking to solve user needs, integrating client feedback into functional, engaging spaces.

PROJECTS

Oct 2022
Jan 2023 | **Dog-Walking App** - Product Design Course Project

- Conducted competitor analysis to identify gaps and user needs in existing apps.
- Created detailed user flows, wireframes, and high-fidelity mock-ups.
- Built a functional prototype in Figma and developed a structured UI library for scalability.

Aug 2022
Sep 2022 | **NFT App** - Intro to UI Design Course Project

- Carried out user research and benchmarking on NFT platforms.
- Built moodboards and designed conceptual layouts based on findings.
- Delivered a complete interactive prototype with reusable UI components.

Apr 2025
May 2025 | **AI Architecture Modelling Product** - AI Product Design Course

- Identified a high-potential commercial use case for AI product design.
- Designed a multi-modal interface prototype focused on productivity and user trust.
- Integrated decision-making augmentation principles and AI touchpoints using HOTL/HITL models.
- Conducted lean user testing and refined UX design based on AI tool feedback and hypothesis validation.
- Applied ethical frameworks (e.g., EU AI Act) and designed guardrails for data output safety.
